🎓 EDUCATION

Software Engineer

Codam Coding College

Oct 2022 – present | Amsterdam, The Netherlands

The only peer-to-peer coding school in the Netherlands, dedicated to educating software engineers based on a project based curriculum and collaboration.

Master in Finance

Academy of Economic Studies of Moldova

Sep 2012 – Jun 2014 | Chisinau, Republic of Moldova

Bachelor in Finance and Banking

Academy of Economic Studies of Moldova

Sep 2009 – Jun 2012 | Chisinau, Republic of Moldova

∞ CODAM PROJECTS

Minishell

Create your own shell based on bash (C project)

Developed a simple command-line shell in C, implementing core functionalities such as command execution, piping, redirections, and built-in commands. Ensured efficient memory management, robust handling of signals, and compatibility with POSIX standards to simulate bash-like behavior.

push_swap

Sort data on a stack (C project)

In my push_swap project, I implemented the radix algorithm to sort data with the least number of operations. The project involved using a set of instructions to manipulate two stacks, a and b, to sort integers in ascending order. My goal was to find the smallest sequence of operations to achieve the sorted stack. Besides radix, I explored other possibilities and decided on radix due to its efficiency for large sets of data.

webserv

Web Server Project (C++)

Developed a fully functional web server capable of handling multiple client requests simultaneously. Gained in-depth understanding of how the internet works behind the scenes, including how web browsers communicate with servers. Implemented key features such as serving websites, handling file uploads, and processing user requests, while ensuring high performance and reliability. Designed the server to be configurable and compatible with modern browsers.

👜 PROFESSIONAL EXPERIENCE

Career break to pursue education in IT

Oct 2023 – present | Amsterdam, The Netherlands

I paused my finance career to study Software Engineering in order to gain new skills that I can apply in the Finance world.

Internal Auditor

Omron Management Center Europe

Jul 2019 – Sep 2023 | Hoofddorp, The Netherlands

- Performed full cycle internal audits at Omron Headquarters and regional entities.
- Evaluated risk areas, analyzed data and effective proposed remediations.

Financial Analyst

Bitfury

Jun 2018 – Jun 2019 | Amsterdam, The Netherlands

- Created financial models based on data analysis to support organizational decision making.
- Developed automated reporting and forecasting tools for more efficient use of data (SQL, Excel)

Revenue Analyst

ServiceNow

Jan 2017 – Apr 2018 | Amsterdam, The Netherlands

- Responsible for the EMEA/APAC regions in terms of deal reviews, structuring.
- Actively involved in the implementation of Revenue Accounting and Reporting tool based on IFRS 15.

Senior Associate Audit and Assurance

Deloitte

Sep 2013 – Dec 2017 | Chisinau, Republic of Moldova

- Lead the team during fieldwork on audit engagements, identifying the risks within various industries, preparing audit plans, establishing appropriate audit procedures and being directly responsible for the reporting process and communication with client management.
