

Dear Hiring Manager,

I am excited to apply for the Business Analyst Credits position at ABN AMRO. With a decade of experience in finance and a solid foundation in software engineering, I bring a unique blend of analytical, technical, and project management skills that align well with your team's mission of executing strategic change initiatives in the areas of data and credits.

My background includes roles in both external and internal audit, where I led cross-functional risk reviews and managed high-stakes stakeholder relationships. I approach every challenge with a structured, analytical mindset and a strong ability to quickly grasp complex systems—skills I've deepened as a software engineering student at Codam Coding College, a study that I am currently finishing. As a software engineer, I've become fluent in Python, C, and C++, and gained hands-on experience in automation and data transformation.

I'm particularly drawn to this role's focus on improving credit lifecycle processes and translating business needs into actionable system changes. My ability to work independently, prioritize effectively, and serve as a bridge between business and IT aligns closely with the expectations for this position. As someone who thrives in organized, purpose-driven environments, I'm eager to help shape credit solutions that are both efficient and user-centric.

My first passion in finance was banking and credit risk—I wrote my bachelor thesis on the topic, and my first job was in a banking accounting team. I would be thrilled to bring this long-standing interest full circle by contributing to ABN AMRO's Credit Facility Management team. Your commitment to innovation, inclusivity, and long-term impact strongly resonates with me, both professionally and personally.

Thank you for considering my application. I would welcome the opportunity to further discuss how my experience and perspective can support ABN AMRO's goals.

Best regards,
Elena Voronin
