

Dear Hiring Manager,

I am excited to apply for the Business Analyst position at Novutech. With a decade of experience in finance and a solid foundation in software engineering, I bring a unique blend of analytical, technical, and project management skills that align well with Novutech's mission of driving digital transformation for modern enterprises.

Throughout my career in internal and external audit, I have led cross-functional risk assessments, streamlined financial processes, and built strong relationships with key stakeholders. Recently, I deepened my technical expertise as a student at Codam Coding College, where I gained hands-on experience in programming (Python, C, C++), system design, and automation—skills that complement my financial background and prepare me to contribute to end-to-end ERP implementations.

What draws me to Novutech is your entrepreneurial spirit and commitment to innovation. I'm eager to collaborate with a team of passionate consultants, contribute to NetSuite configurations that reflect clients' real-world challenges, and help improve project delivery from both a business and IT perspective. I thrive in fast-paced environments where continuous learning is encouraged, and I'm motivated by the opportunity to contribute ideas and grow alongside a supportive, international team. I am particularly interested in system implementations and improvements, which I have been involved in during my time both at ServiceNow and Omron.

I am comfortable navigating complex systems independently, I am confident in my ability to support your clients and help bring clarity and efficiency to their operations. I am especially excited to work with a company that values both personal development and making a tangible impact.

Thank you for considering my application. I would be delighted to further discuss how I can contribute to Novutech's growth and success.

Best regards,
Elena Voronin
